

# PATIENT SCREENING REPORT

Retinal Edge Triage — Explainable AI-Assisted Diabetic Retinopathy Screening for Rural Healthcare  
Screening Date & Time: 09-Sep-2026 09:38 UTC | Reference ID: SCR-2026-000072

|                               |                                      |                                            |
|-------------------------------|--------------------------------------|--------------------------------------------|
| Patient ID: RET-2026-469863   | Full Name: Devi                      | Age / Gender: 38 / Female                  |
| Screening ID: SCR-2026-000072 | Location: PHC Rampur, Rural District | Diabetes Type / Duration: Type 1 (5 years) |

## 1. Retinal Image Acquisition & Quality Gate

|                          |                             |                          |                                   |
|--------------------------|-----------------------------|--------------------------|-----------------------------------|
| Eye Evaluated: Right Eye | Image Source: Fundus Camera | Quality Score: 69.5%     | Quality Status: <b>BORDERLINE</b> |
| Focus / Blur: 21.9%      | Illumination: 75.4%         | Vessel Visibility: 77.7% | Field of View: 92.3%              |

## 2. Diabetic Retinopathy Screening & Detection Result

|                      |                                                                                                            |                      |                                                                                           |
|----------------------|------------------------------------------------------------------------------------------------------------|----------------------|-------------------------------------------------------------------------------------------|
| DR Detection Result: | <b>Diabetic Retinopathy: DETECTED</b>                                                                      | DR Grade & Severity: | Grade: 2 — Moderate NPDR                                                                  |
| Model Confidence:    | 96.6%                                                                                                      | DME Risk Status:     | Possible DME detected                                                                     |
| Result Explanation:  | Moderate non-proliferative changes with microaneurysms (12) and exudates (13). Secondary review indicated. | Recommended Action:  | <b>Ophthalmology evaluation recommended within 3 months for stereoscopic examination.</b> |

## 3. Human-in-the-Loop Ophthalmologist Adjudication

|                       |                                                                               |                         |                     |
|-----------------------|-------------------------------------------------------------------------------|-------------------------|---------------------|
| Doctor Decision:      | ACCEPTED                                                                      | Reviewing Doctor:       | Dr. Ophthalmologist |
| Final Grade Assigned: | Grade 2                                                                       | Override Justification: | None                |
| Clinical Notes:       | Clinical findings are consistent with non-proliferative diabetic retinopathy. | HCW Instructions:       | None                |

## 4. Risk Triage & Clinical Disposition

|                         |                                        |                     |          |
|-------------------------|----------------------------------------|---------------------|----------|
| Risk Category:          | HIGH RISK                              | Referral Priority:  | URGENT   |
| Referral Reference ID:  | REF-2026-00028                         | Follow-up Schedule: | 1 Months |
| Clinical Justification: | High Risk: Grade 2 with DME suspicion. | Referral Status:    | PENDING  |

## 5. Recommended Eye-Care Facility (Referral Destination)

|                         |                                                                     |                 |                  |
|-------------------------|---------------------------------------------------------------------|-----------------|------------------|
| Hospital / Clinic Name: | ABC Eye Hospital                                                    | Distance:       | 2.4 km away      |
| Hospital Address:       | Sayyaji Rao Road, Medar Block, Yadavagiri, Mysuru, Karnataka 570020 | Contact Number: | +91 821 241 9300 |

|                      |                                                                            |                          |                                           |
|----------------------|----------------------------------------------------------------------------|--------------------------|-------------------------------------------|
| Reason for Referral: | Moderate NPDR requires ophthalmic evaluation based on AI screening result. | Navigation / Directions: | <a href="#">View Map &amp; Directions</a> |

**STATUTORY CLINICAL NOTICE:** This report is generated by an artificial intelligence screening triage prototype (Retinal Edge Triage). AI predictions DO NOT constitute a definitive medical diagnosis. Final clinical interpretation and management must always be performed by a qualified ophthalmologist. Compliant with rural screening clinical governance principles.
