

# PATIENT SCREENING REPORT

Retinal Edge Triage — Explainable AI-Assisted Diabetic Retinopathy Screening for Rural Healthcare  
Screening Date & Time: 10-Sep-2026 10:19 UTC | Reference ID: SCR-2026-000077

|                               |                            |                                            |
|-------------------------------|----------------------------|--------------------------------------------|
| Patient ID: RET-2026-000078   | Full Name: Ramesh Gowda    | Age / Gender: 58 / Male                    |
| Screening ID: SCR-2026-000077 | Location: Mysuru Rural PHC | Diabetes Type / Duration: Type 2 (8 years) |

## 1. Retinal Image Acquisition & Quality Gate

|                          |                                      |                          |                                   |
|--------------------------|--------------------------------------|--------------------------|-----------------------------------|
| Eye Evaluated: Right Eye | Image Source: Portable Fundus Camera | Quality Score: 67.3%     | Quality Status: <b>BORDERLINE</b> |
| Focus / Blur: 31.2%      | Illumination: 52.2%                  | Vessel Visibility: 79.7% | Field of View: 91.5%              |

## 2. Diabetic Retinopathy Screening & Detection Result

|                      |                                                                                                           |                      |                                                                                           |
|----------------------|-----------------------------------------------------------------------------------------------------------|----------------------|-------------------------------------------------------------------------------------------|
| DR Detection Result: | <b>Diabetic Retinopathy: DETECTED</b>                                                                     | DR Grade & Severity: | Grade: 2 — Moderate NPDR                                                                  |
| Model Confidence:    | 96.6%                                                                                                     | DME Risk Status:     | Possible DME detected                                                                     |
| Result Explanation:  | Moderate non-proliferative changes with microaneurysms (8) and exudates (11). Secondary review indicated. | Recommended Action:  | <b>Ophthalmology evaluation recommended within 3 months for stereoscopic examination.</b> |

## 3. Human-in-the-Loop Ophthalmologist Adjudication

|                       |                                                     |                         |                                                |
|-----------------------|-----------------------------------------------------|-------------------------|------------------------------------------------|
| Doctor Decision:      | ACCEPTED                                            | Reviewing Doctor:       | Dr. Ophthalmologist                            |
| Final Grade Assigned: | Grade 2                                             | Override Justification: | None                                           |
| Clinical Notes:       | Retinal signs compatible with diabetic retinopathy. | HCW Instructions:       | Issue referral and schedule patient transport. |

## 4. Risk Triage & Clinical Disposition

|                         |                                       |                     |          |
|-------------------------|---------------------------------------|---------------------|----------|
| Risk Category:          | HIGH RISK                             | Referral Priority:  | URGENT   |
| Referral Reference ID:  | REF-2026-00030                        | Follow-up Schedule: | 3 Months |
| Clinical Justification: | Moderate DR with DME risk identified. | Referral Status:    | PENDING  |

## 5. Recommended Eye-Care Facility (Referral Destination)

|                         |                                             |                 |                  |
|-------------------------|---------------------------------------------|-----------------|------------------|
| Hospital / Clinic Name: | Narayana Nethralaya Vitreoretinal Institute | Distance:       | 2.1 km away      |
| Hospital Address:       | Main Road, Area Sector 1                    | Contact Number: | +91 80 6612 1400 |

|                      |                                                                            |                          |                                           |
|----------------------|----------------------------------------------------------------------------|--------------------------|-------------------------------------------|
| Reason for Referral: | Moderate NPDR requires ophthalmic evaluation based on AI screening result. | Navigation / Directions: | <a href="#">View Map &amp; Directions</a> |
