

# PATIENT SCREENING REPORT

Retinal Edge Triage — Explainable AI-Assisted Diabetic Retinopathy Screening for Rural Healthcare  
Screening Date & Time: 11-Sep-2026 13:33 UTC | Reference ID: SCR-2026-000141

|                               |                                    |                                            |
|-------------------------------|------------------------------------|--------------------------------------------|
| Patient ID: PAT-DR-0142       | Full Name: Acceptance Test Patient | Age / Gender: 58 / Female                  |
| Screening ID: SCR-2026-000141 | Location: PHC Rampur Village       | Diabetes Type / Duration: Type 2 (6 years) |

## 1. Retinal Image Acquisition & Quality Gate

|                          |                             |                          |                      |
|--------------------------|-----------------------------|--------------------------|----------------------|
| Eye Evaluated: Right Eye | Image Source: Fundus Camera | Quality Score: 91.0%     | Quality Status: GOOD |
| Focus / Blur: 88.0%      | Illumination: 92.0%         | Vessel Visibility: 91.0% | Field of View: 94.0% |

## 2. Diabetic Retinopathy Screening & Detection Result

|                      |                                                                                                          |                      |                                                                                    |
|----------------------|----------------------------------------------------------------------------------------------------------|----------------------|------------------------------------------------------------------------------------|
| DR Detection Result: | Diabetic Retinopathy: DETECTED                                                                           | DR Grade & Severity: | Grade: 2 — Moderate DR                                                             |
| Model Confidence:    | 94.0%                                                                                                    | DME Risk Status:     | Possible DME detected                                                              |
| Result Explanation:  | Moderate non-proliferative changes with microaneurysms (8) and exudates (5). Secondary review indicated. | Recommended Action:  | Ophthalmology evaluation recommended within 3 months for stereoscopic examination. |

## 3. Previous vs Current Screening Comparison

|                     |                                |                    |                                                           |
|---------------------|--------------------------------|--------------------|-----------------------------------------------------------|
| Previous Screening: | Date: 2026-09-11   Grade: DR 2 | Current Screening: | Date: 11-Sep-2026 13:33 UTC   Grade: DR 3                 |
| Overall Trend:      | WORSENE                        | Recommendation:    | Specialist review recommended due to disease progression. |

## 4. Human-in-the-Loop Ophthalmologist Adjudication

|                       |                                                 |                         |                                       |
|-----------------------|-------------------------------------------------|-------------------------|---------------------------------------|
| Doctor Decision:      | OVERRIDDEN                                      | Reviewing Doctor:       | Dr. Rajesh Varma, MS (Ophthal)        |
| Final Grade Assigned: | Grade 3                                         | Override Justification: | None                                  |
| Clinical Notes:       | Severe non-proliferative retinopathy developed. | HCW Instructions:       | Urgent referral to retina specialist. |

## 5. Risk Triage & Clinical Disposition

|                |           |                    |        |
|----------------|-----------|--------------------|--------|
| Risk Category: | HIGH RISK | Referral Priority: | URGENT |
|----------------|-----------|--------------------|--------|

|                         |                                       |                     |          |
|-------------------------|---------------------------------------|---------------------|----------|
| Referral Reference ID:  | REF-2026-00124                        | Follow-up Schedule: | 3 Months |
| Clinical Justification: | Moderate DR with DME risk identified. | Referral Status:    | PENDING  |

6. Recommended Eye-Care Facility (Referral Destination)

|                         |                                                                             |                             |                                           |
|-------------------------|-----------------------------------------------------------------------------|-----------------------------|-------------------------------------------|
| Hospital / Clinic Name: | ABC Eye Hospital                                                            | Distance:                   | 2.4 km away                               |
| Hospital Address:       | Sayyaji Rao Road, Medar Block,<br>Yadavagiri, Mysuru, Karnataka 570020      | Contact Number:             | +91 821 241 9000                          |
| Reason for Referral:    | Moderate DR requires ophthalmic<br>evaluation based on AI screening result. | Navigation /<br>Directions: | <a href="#">View Map &amp; Directions</a> |

7. Patient Care & Lifestyle Guidance

**Guidance:** Severe diabetic retinal changes were detected. Specialist eye evaluation is recommended.

- Take prescribed diabetes medicines regularly.
- Monitor blood glucose as advised by your healthcare provider.
- Follow a balanced diet rich in vegetables and whole grains.
- Stay physically active as advised by your healthcare provider.
- Avoid smoking and tobacco products.
- Attend recommended comprehensive eye check-ups.
- Do not stop prescribed medicines without consulting your doctor.

**NOTICE:** Patient care and lifestyle guidance support general wellness and glycemic control, but do not cure or reverse diabetic retinopathy (DR 1–4) and cannot replace examination by an eye specialist.

**STATUTORY CLINICAL NOTICE:** This referral recommendation is based on the screening assessment. Final clinical management should be determined by a qualified healthcare professional. AI predictions DO NOT constitute a definitive medical diagnosis. Final clinical interpretation and management must always be performed by a qualified ophthalmologist.
